

RACING

MUSTANG SUPERCAR

This 'Gen 3' Mustang Supercar built for the Australian-based Repco Supercars Championship is more closely aligned with its road-going brethren than ever before, with its production-based Coyote V8 engine and seventh-generation Mustang styling, featuring the iconic low roofline and long hood that makes Mustang the world's favorite sports car. Racking up 6 of the 7 race wins so far in the 2026 Repco Supercars Championship, the Gen 3 Mustang Supercar is poised to ensure Ford continues its strong racing legacy in Australia.
